**Vaginal Anti Infectives Market Regional  
Analysis, Demand Analysis and Competitive  
Outlook 2025-2032**

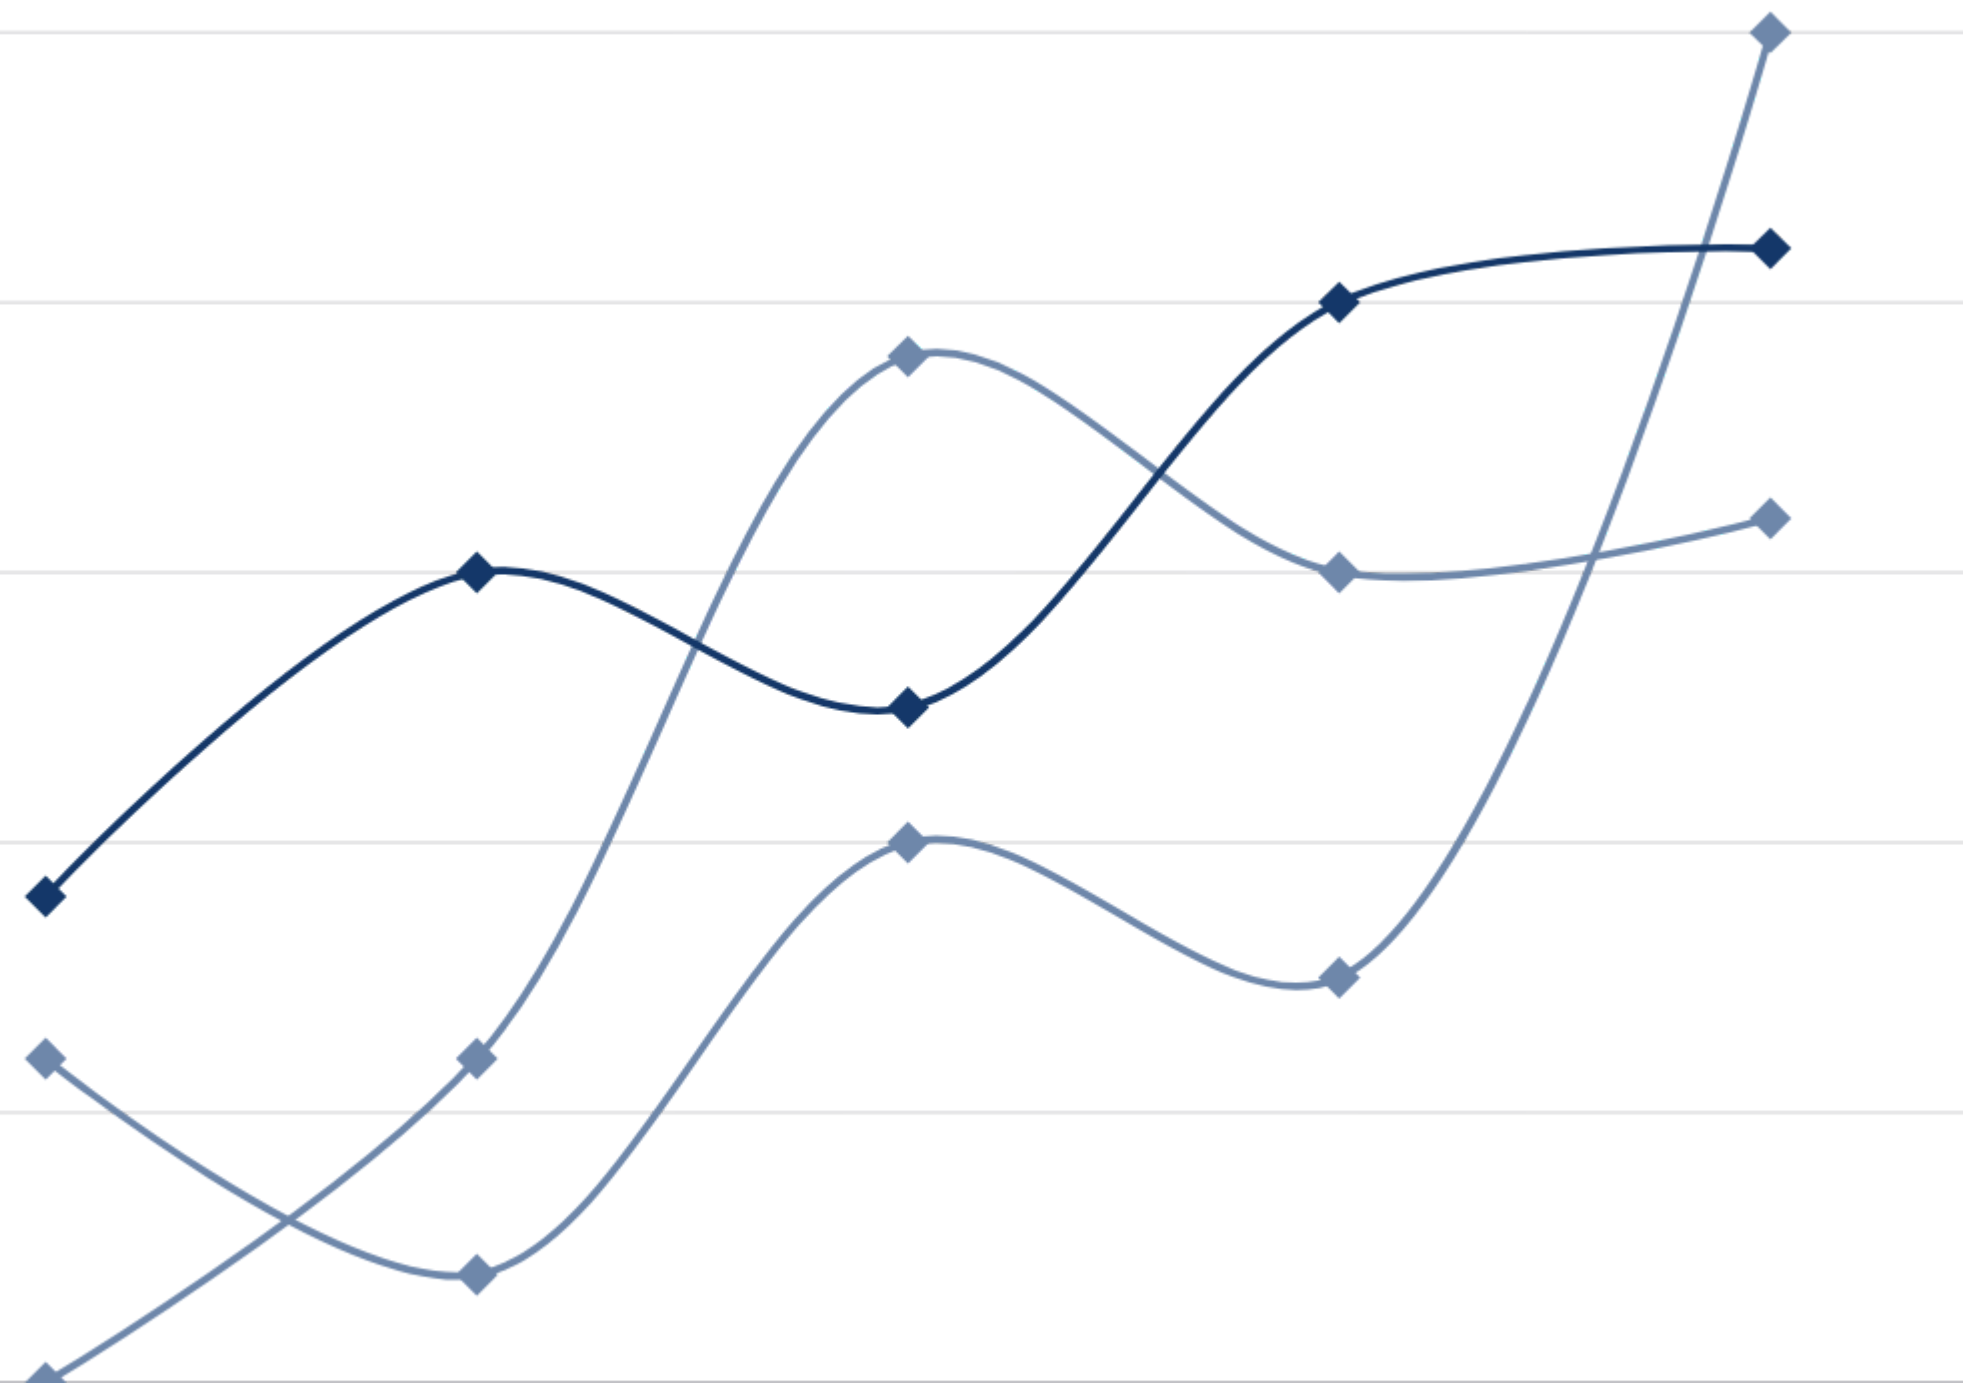

# Market Overview

**Global vaginal anti-infectives market size was valued at USD 3.07 billion in 2024. The market is projected to grow from USD 3.25 billion in 2025 to USD 4.47 billion by 2031, exhibiting a CAGR of 5.6% during the forecast period.**

**Vaginal anti-infectives are therapeutic agents used to treat or prevent infections caused by bacteria, fungi, viruses, or other microorganisms in the vaginal area. These pharmaceutical products work by either killing pathogens or inhibiting their growth, addressing conditions such as bacterial vaginosis, candidal vaginitis (yeast infections), and trichomonal vaginitis. The global burden of vaginal infections remains significant, with approximately 33% of women experiencing symptoms during their reproductive years due to microbial imbalances.**
