**Coagulation Filter Market Regional Analysis,
Demand Analysis and Competitive Outlook 2025-
2032**

Market Overview

The global coagulation filter market size was valued at USD 433 million in 2024. The market is projected to grow from USD 449 million in 2025 to USD 537 million by 2031, exhibiting a CAGR of 3.2% during the forecast period.

Coagulation filters are medical devices designed to remove blood clots, fibrin, and other particulate matter from blood components during medical procedures. These filters play a critical role in transfusion medicine, cardiac surgeries, and dialysis treatments by improving patient safety and treatment efficacy. The product landscape includes both disposable and reusable variants, with applications spanning hospitals and clinics.
