Healthcare Market Intelligence

The global bipolar forceps market was valued at USD 729 million in 2024 and is projected to reach USD 947 million by 2031, exhibiting a CAGR of 3.9% during the forecast period. This growth is primarily driven by increasing surgical procedures globally, particularly in minimally invasive surgeries where bipolar forceps are essential for precise hemostasis. The rising prevalence of chronic diseases requiring surgical intervention, coupled with advancements in electrosurgical equipment, continues to fuel market expansion.
