**PLACENTA MARKET REGIONAL ANALYSIS,
DEMAND ANALYSIS AND COMPETITIVE
OUTLOOK 2025-2032**

•

Market Overview

The global placenta market was valued at USD 72.6 million in 2024 and is projected to reach USD 125 million by 2031, exhibiting a CAGR of 8.3% during the forecast period. This growth is primarily driven by increasing applications in cosmetic formulations and regenerative medicine, where placental extracts are valued for their high concentrations of growth factors, cytokines, and extracellular matrix components.

The market is concentrated in specific regions, with Japan accounting for the largest consumption share at approximately 36%, followed by Europe with 15% market share. North America and other Asian markets are also significant contributors. The market remains highly fragmented with the top three vendors holding about 30% market share combined.

Market size

MARKET INSIGHTS

2024

USD 72.6 million in 2024

2032

USD 125 million by 2031

CAGR

CAGR of 8.3%

By Type

- Human Placental Extracts
- Animal-Derived Placental Products

Human Placental Extracts dominate the market due to higher bioavailability and compatibility with human biology, though ethical sourcing remains a critical consideration for manufacturers in this space.

By Application

- **Cosmetics and Skincare**
- **Regenerative Medicine**
- **Nutraceuticals and Supplements**
- **Research and Development**

Cosmetics and Skincare leads due to premium positioning of placenta-infused skincare lines and consumer willingness to pay premium prices for novel anti-aging solutions with perceived natural origins.

Our Key Players

- Merck KGaA (Germany)
- Thermo Fisher Scientific Inc. (US)
- Fujifilm Holdings Corporation (Japan)
- ReGen Labs (US)
- Pluristem Therapeutics Inc. (Israel)
