**MOBILE C-ARM MACHINE MARKET
REGIONAL ANALYSIS, DEMAND ANALYSIS
AND COMPETITIVE OUTLOOK 2025-2032**

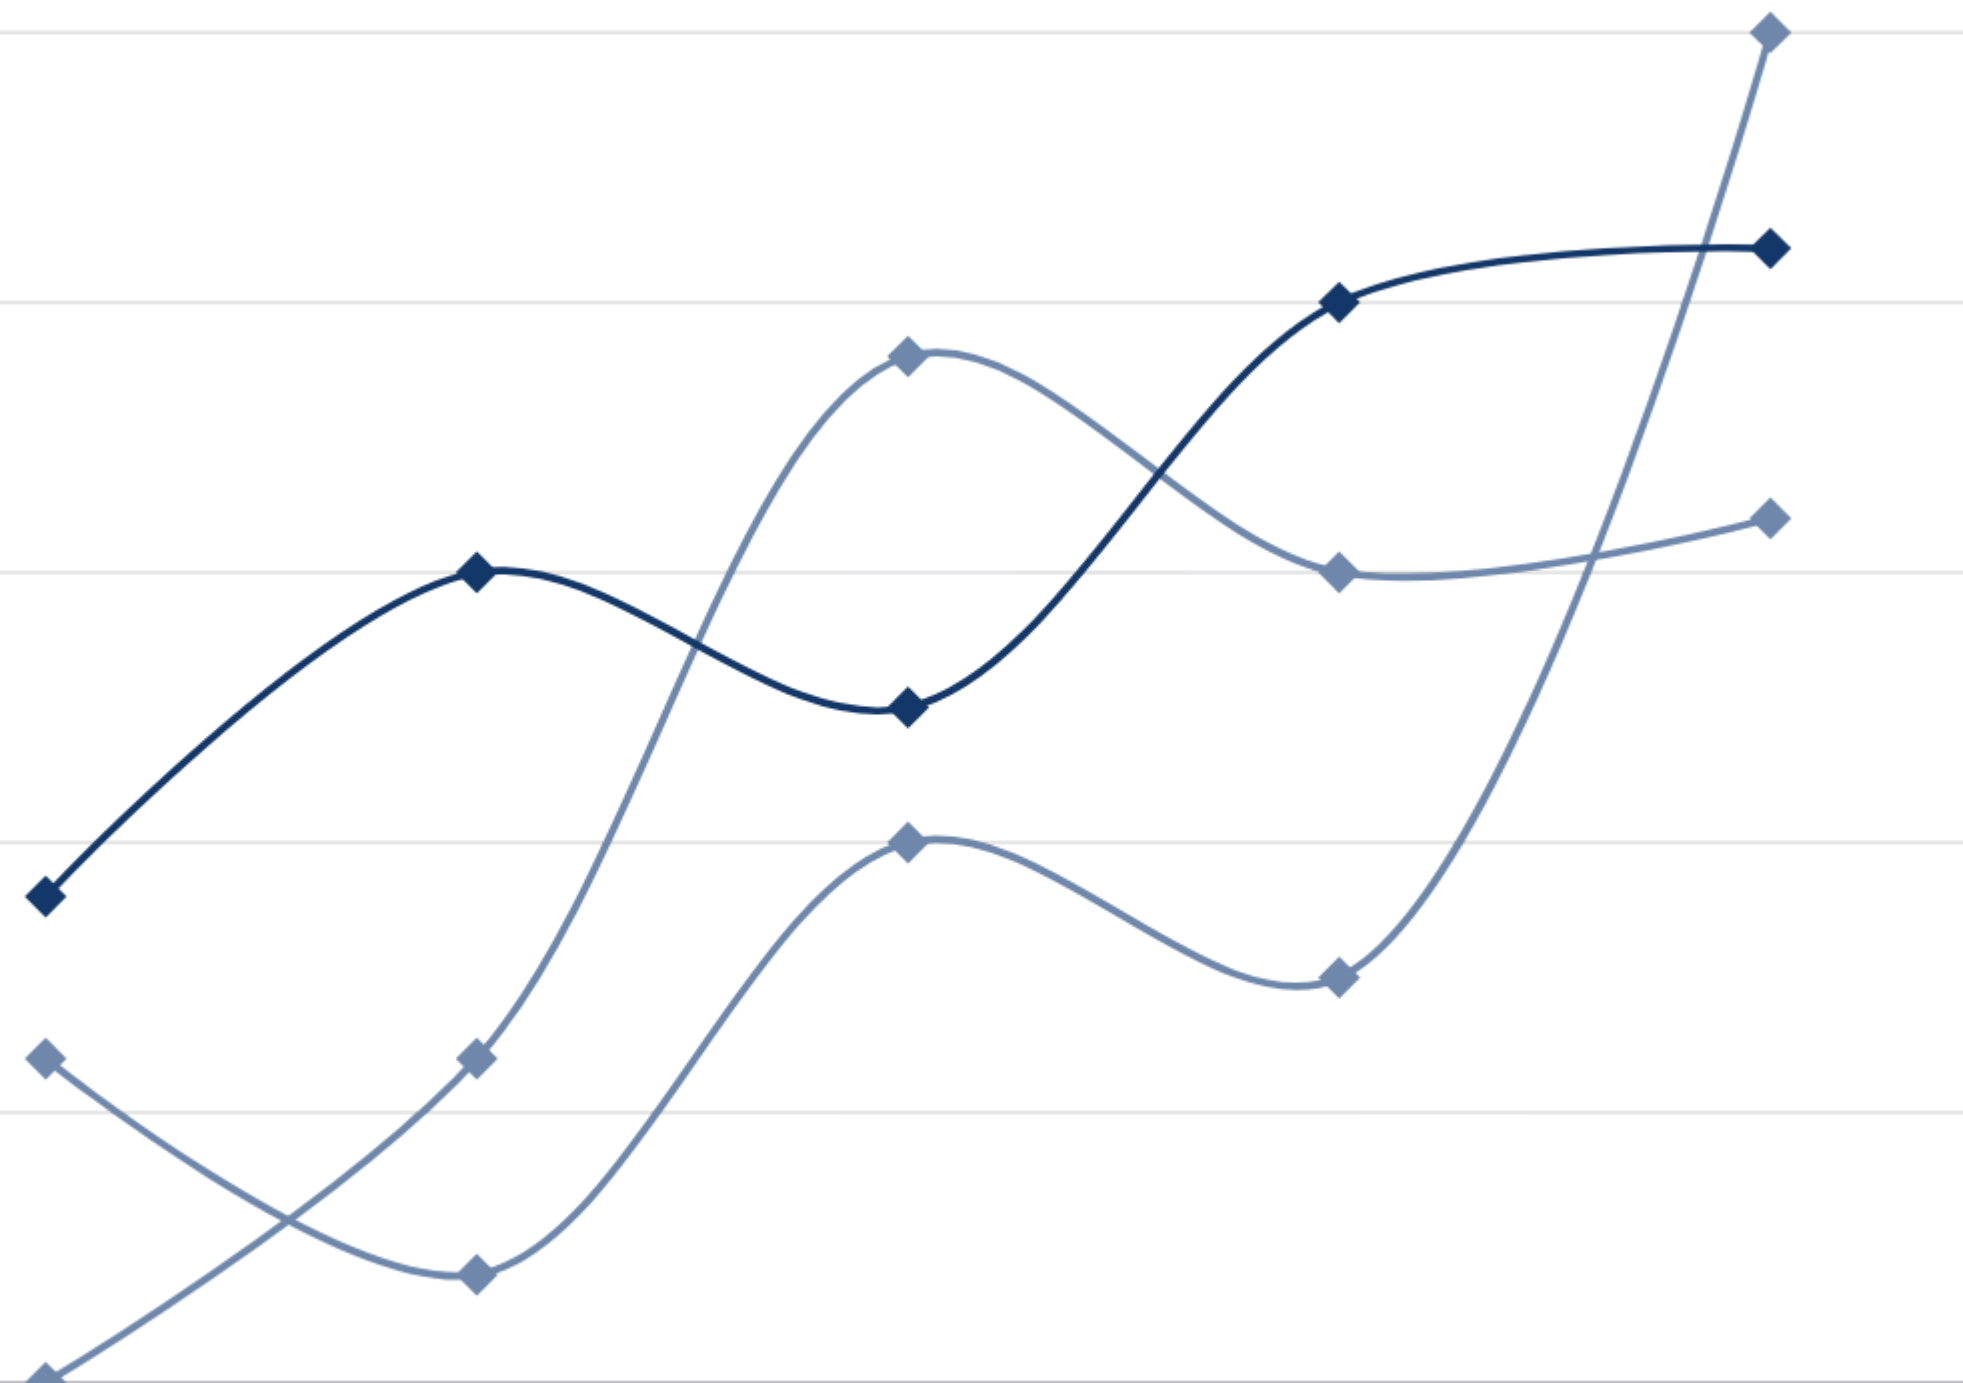

Market Overview

The global Mobile C-arm Machine market was valued at USD 1.36 billion in 2024. The market is projected to grow from USD 1.43 billion in 2025 to USD 2.41 billion by 2031, exhibiting a CAGR of 5.1% during the forecast period. Mobile C-arm machines are specialized medical imaging systems that provide real-time X-ray guidance during surgical and diagnostic procedures. These systems are crucial for orthopedic, cardiovascular, and neurological interventions, offering both 2D and 3D imaging capabilities with varying levels of mobility and image intensification.

Market size

MARKET INSIGHTS

2024

USD 1.36 billion in 2024

2032

USD 2.41 billion by 2031

CAGR

CAGR of 5.1%

By Type

- Full-size C-arms
- Mini C-arms

Full-size C-arms dominate the market due to their superior imaging capabilities and versatility across diverse surgical environments, while mini C-arms are gaining traction in outpatient settings and smaller clinics where space optimization is a priority without compromising on image quality.

-

By Application

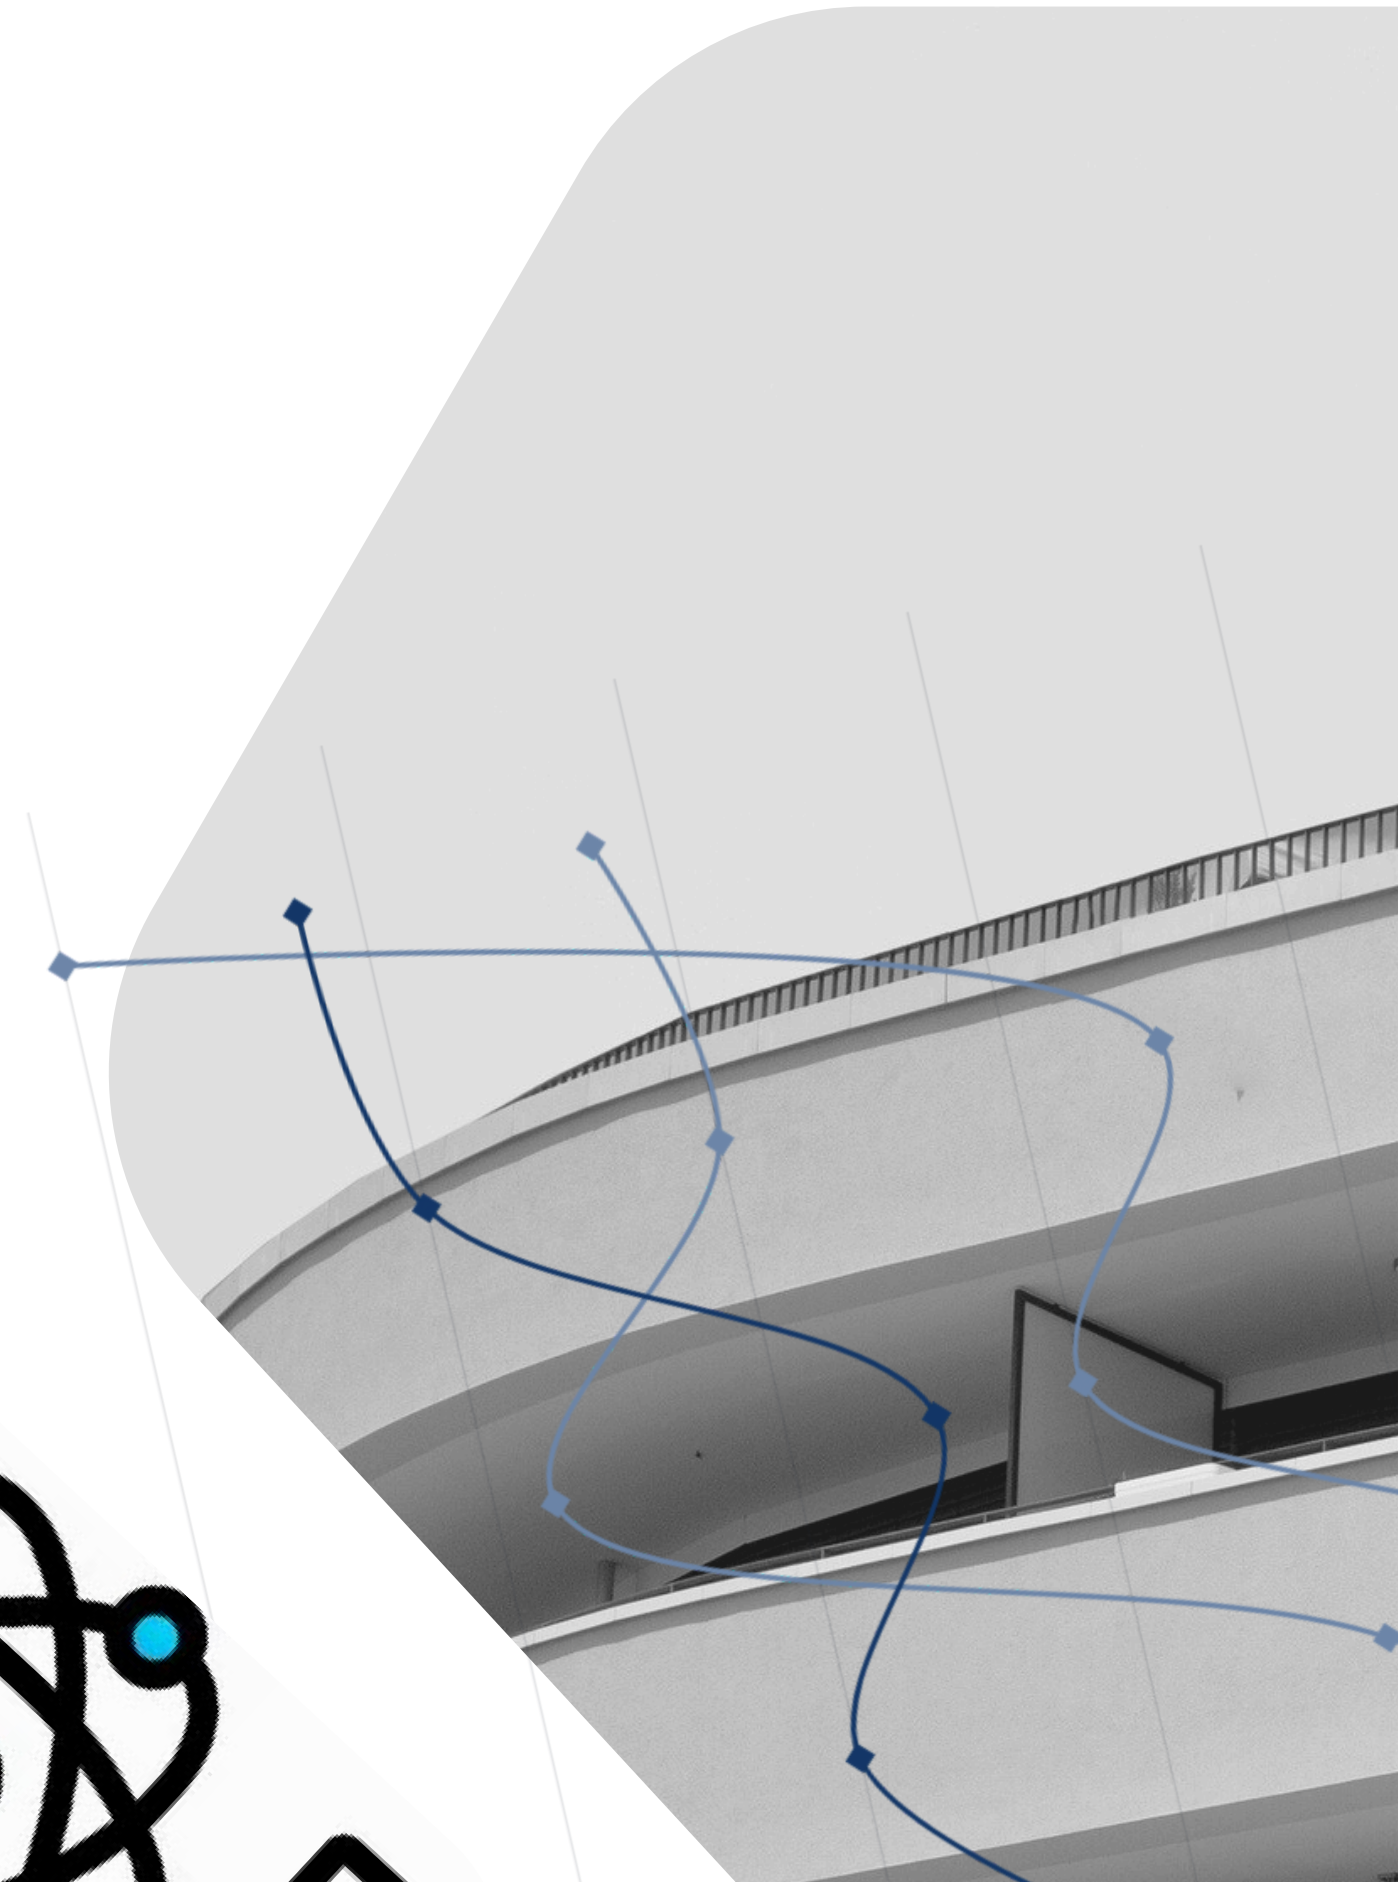

- Orthopedic surgery
- Traumatology
- Pain management
- Cardiology and electrophysiology
- Other applications

Orthopedic surgery represents the largest application segment due to high demand for joint replacement and spinal surgeries, while pain management applications are growing rapidly due to minimally invasive procedures and interventional pain management techniques requiring real-time imaging guidance.
