Market Overview

Global Anti-inflammatory Spray market was valued at USD 1,566 million in 2024 and is projected to reach USD 2,063 million by 2031, exhibiting a CAGR of 4.1% during the forecast period.

Anti-inflammatory sprays are topical formulations designed to alleviate inflammation, pain, and swelling in affected areas. These products typically contain active ingredients like corticosteroids or non-steroidal anti-inflammatory drugs (NSAIDs) that target inflammatory responses, providing quick relief for conditions such as arthritis, muscle strains, or skin irritations. They are available for human use as well as pet applications, often in aerosol or pump dispensers for easy administration.
