**NANODISC MSP PROTEIN MARKET
REGIONAL ANALYSIS, DEMAND ANALYSIS
AND COMPETITIVE OUTLOOK 2025-2032**

-

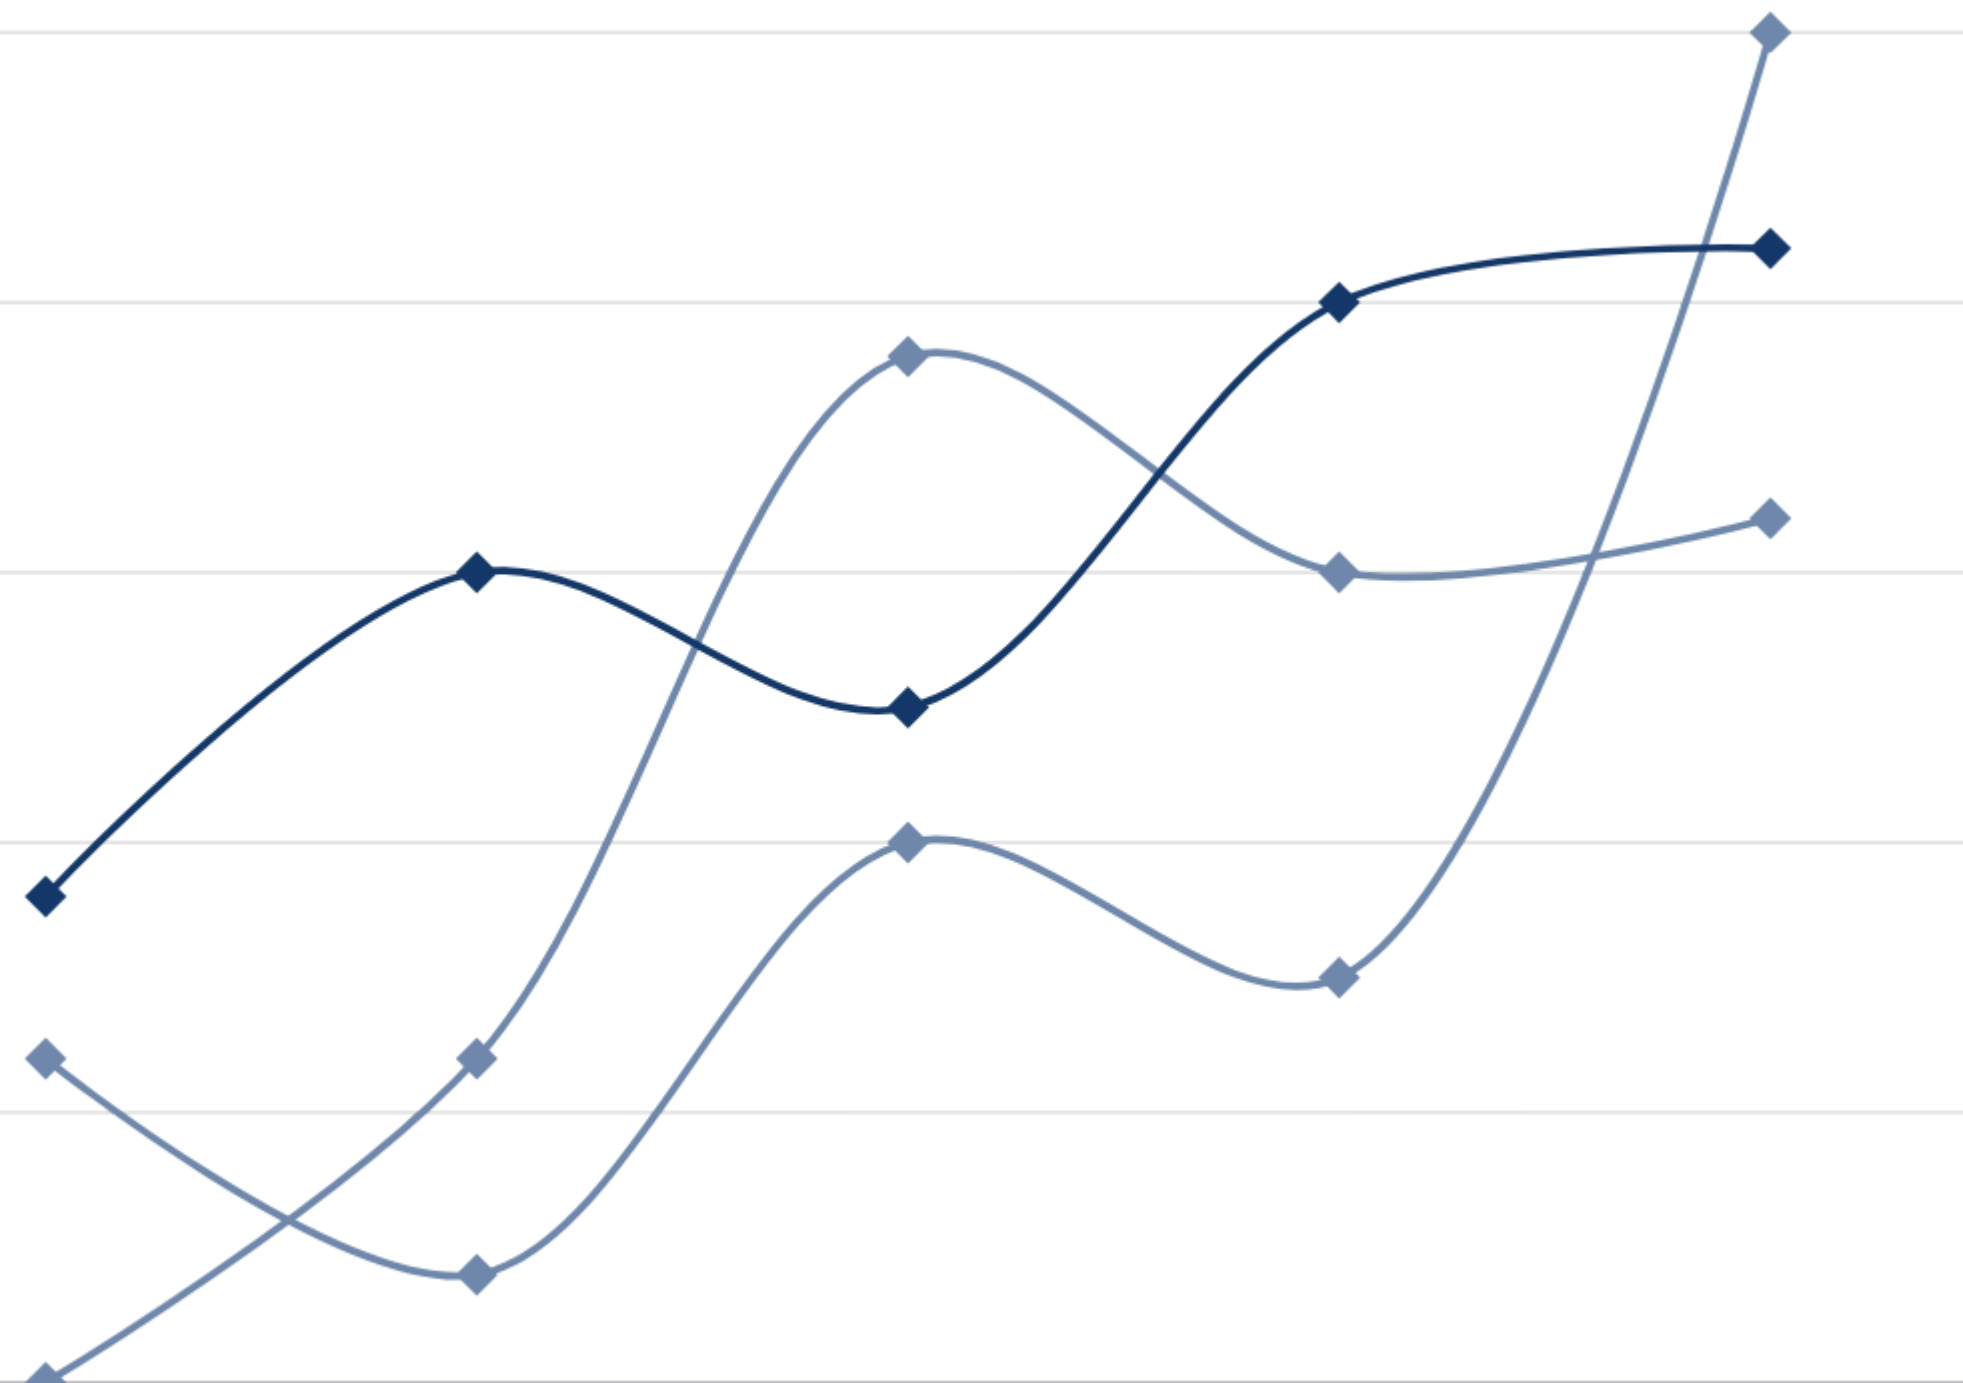

Market Overview

Global Nanodisc MSP Protein market was valued at USD 202 million in 2024 and is projected to reach USD 303 million by 2031, exhibiting a CAGR of 6.1% during the forecast period.

Membrane scaffold proteins (MSPs) are essential tools for structural and functional studies of membrane proteins. These specialized proteins form lipid bilayer nanodiscs that provide a stable, soluble environment for analyzing membrane proteins in their native state. The technology enables researchers to study challenging targets such as G-protein-coupled receptors (GPCRs), ion channels, and transporters with high precision.

Market size

MARKET INSIGHTS

2024

USD 202 million in 2024

2032

USD 303 million by 2031

CAGR

CAGR of 6.1%

By Type

Labeled Segment Dominates the Market Due to its Enhanced Utility in Imaging and Spectroscopic Studies

The market is segmented based on type into:

- **Labeled**
- **Unlabeled**
-

By Application

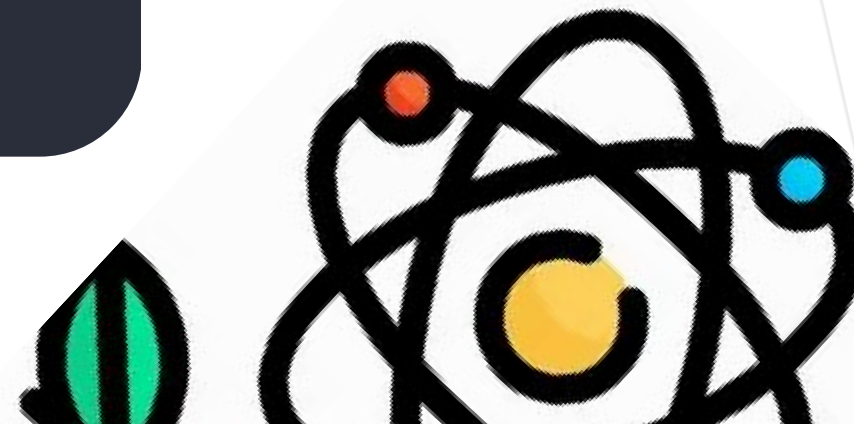

Drug Development and Discovery Segment Leads Due to High Adoption in Biopharmaceutical Research and Protein Structure Analysis

The market is segmented based on application into:

- **Cancer**
- **Neurodegenerative Diseases**
- **Infectious Disease**
- **Drug development and Discovery**
- **Others**

Our Key Players

- Cube Biotech
- Creative Biostructure
- Merck KGaA
- ACROBiosystems
