**DRUGS FOR INFECTIOUS DISEASES CAUSED
BY NEISSERIA GONORRHOEAE MARKET
REGIONAL ANALYSIS, DEMAND ANALYSIS
AND COMPETITIVE OUTLOOK 2025-2032**

•

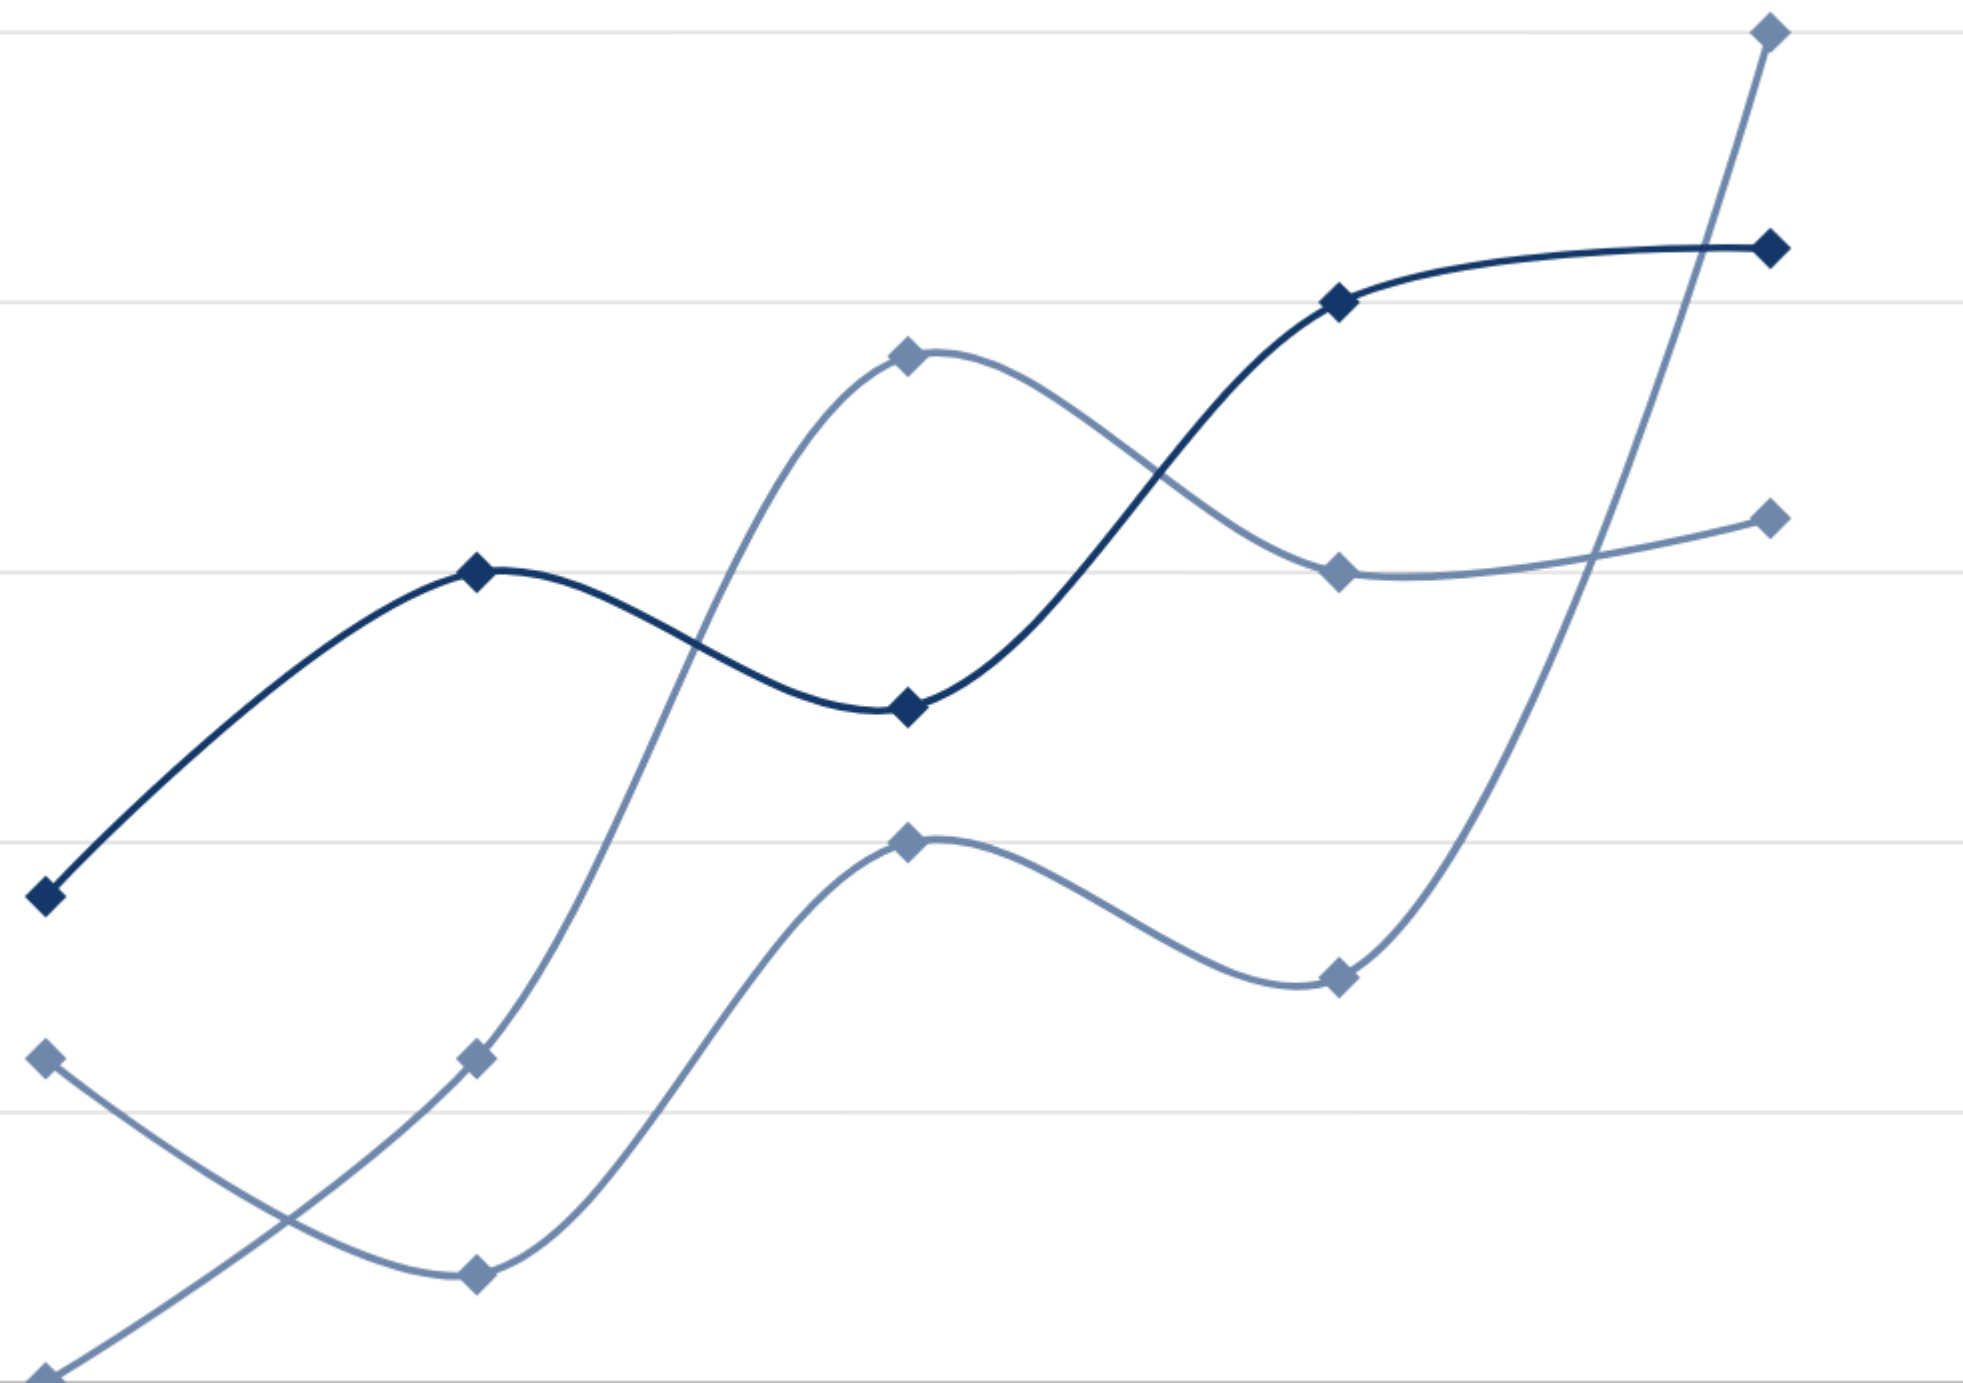

Market Overview

Global Drugs for Infectious Diseases Caused by Neisseria Gonorrhoeae market was valued at USD 1.21 billion in 2024. The market is projected to grow from USD 1.28 billion in 2025 to USD 1.81 billion by 2032, exhibiting a CAGR of 5.8% during the forecast period.

Drugs for infectious diseases caused by Neisseria gonorrhoeae represent a critical class of antimicrobial agents targeting gonorrhea and related infections. These include third-generation cephalosporins (such as ceftriaxone), tetracyclines (like doxycycline), macrolides (including azithromycin), and aminoglycosides (e.g., gentamicin). Due to the bacterium's notorious antibiotic resistance patterns, treatment protocols require strict adherence to evolving clinical guidelines and regional susceptibility profiles.

Market size

MARKET INSIGHTS

2024

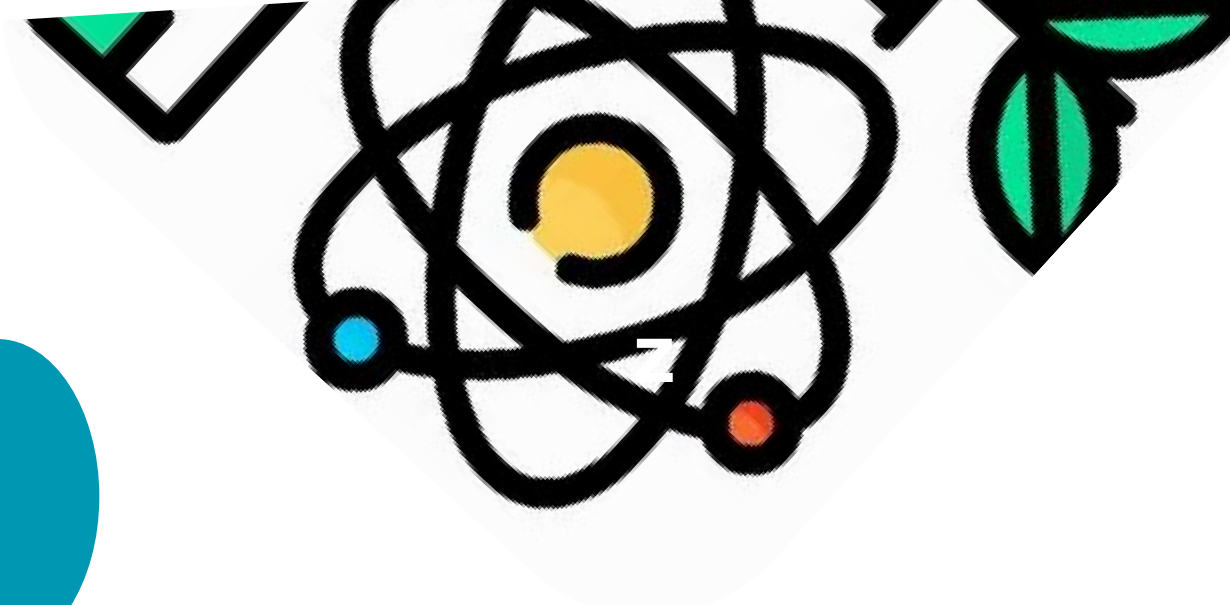

USD 1.21 billion in 2024

2032

USD 1.21 billion in 2024

CAGR

CAGR of 5.8%

By Type

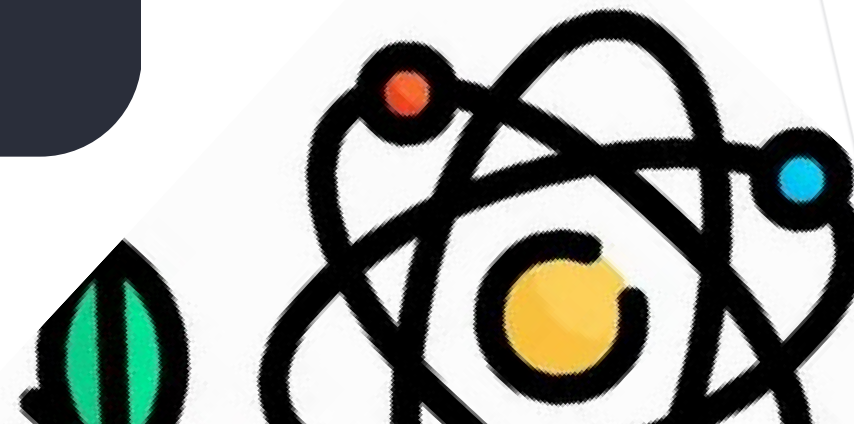

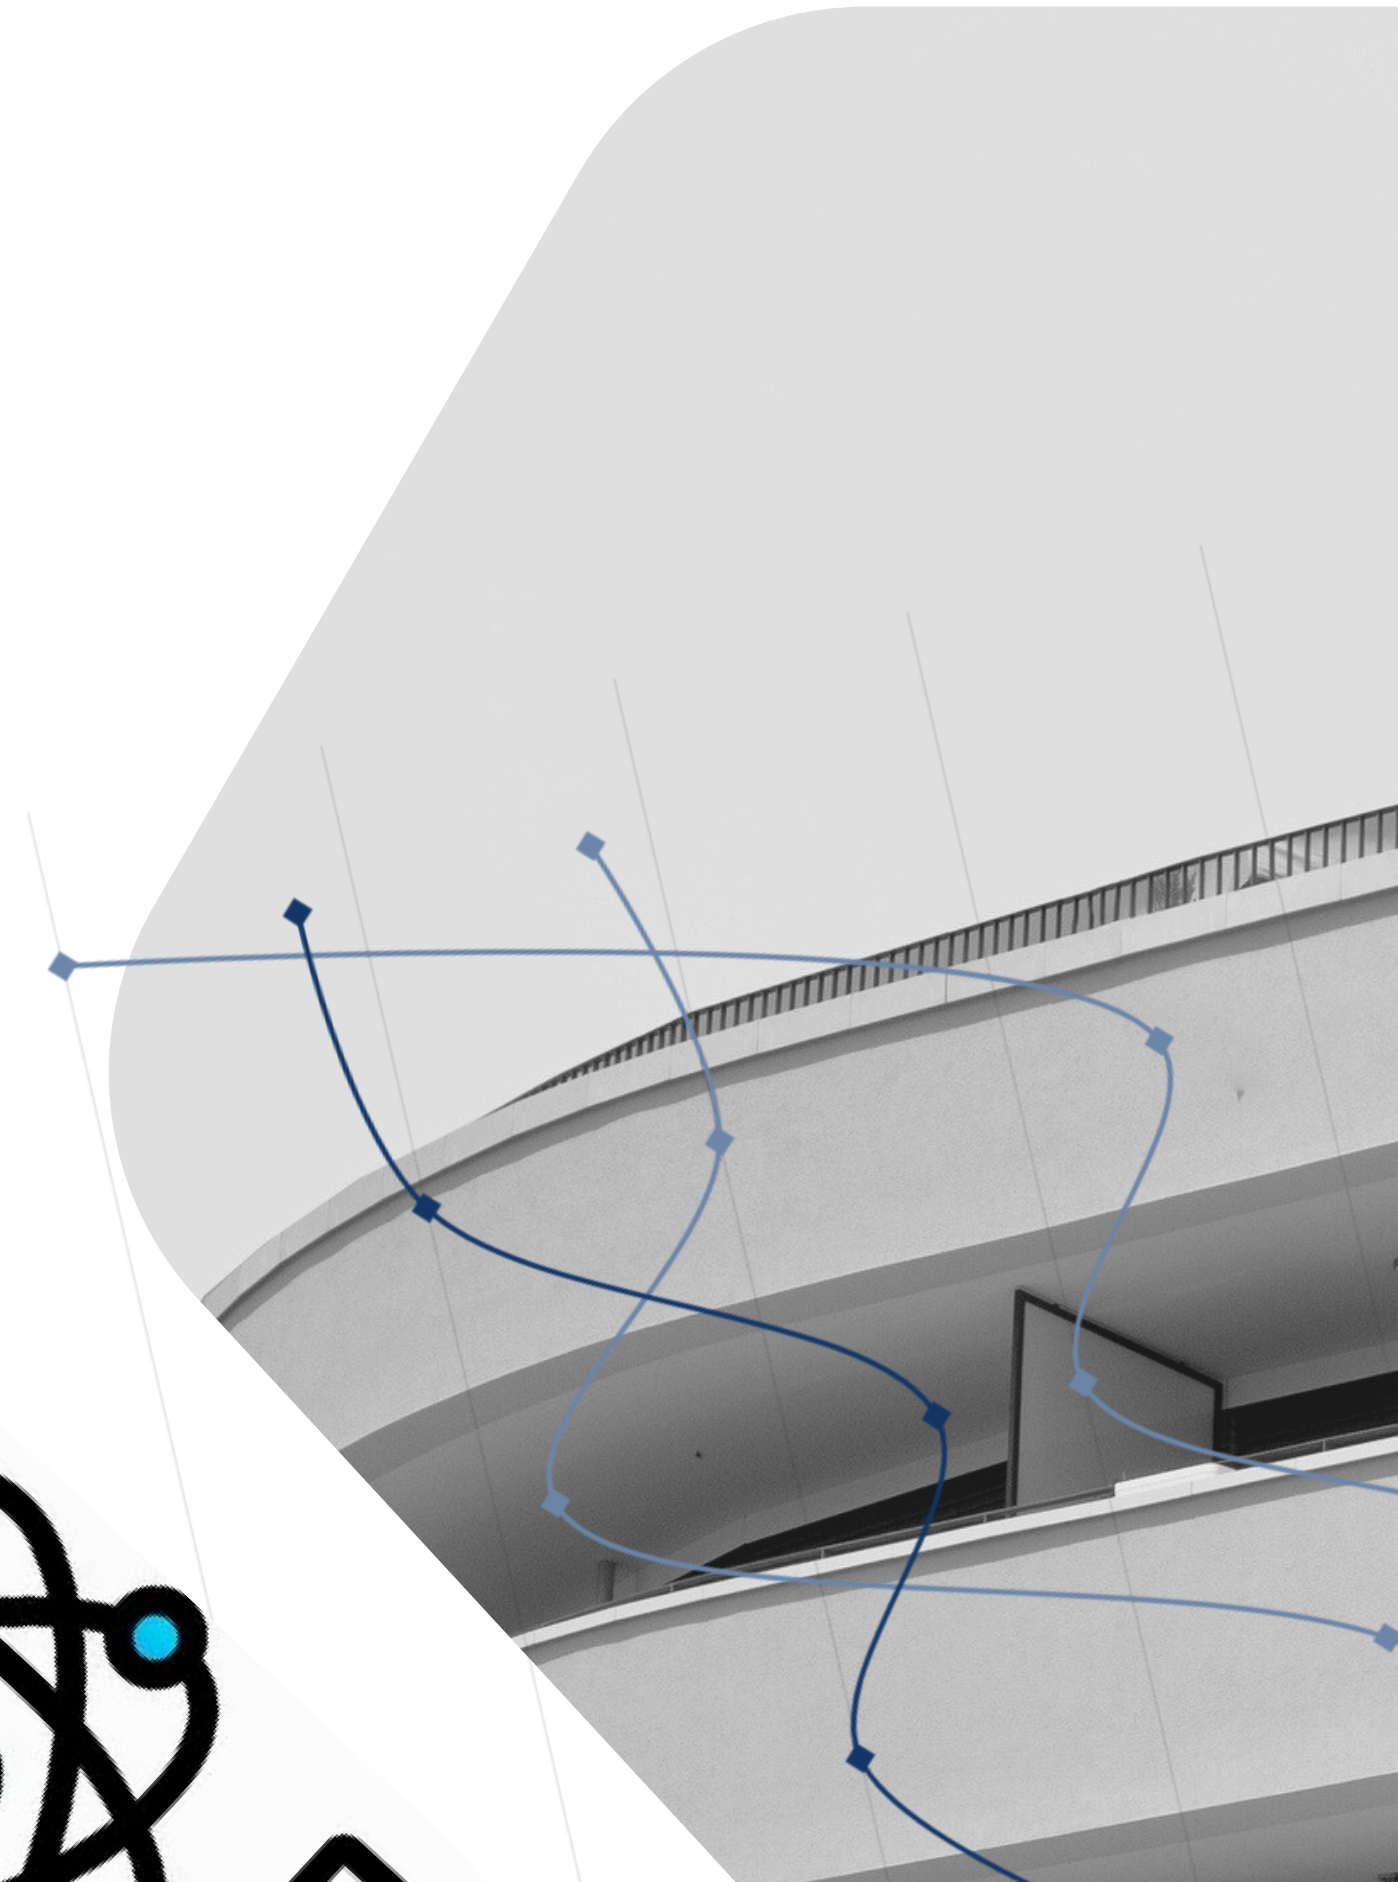

- The market is segmented based on type into:
- Ceftriaxone
- Subtypes: Injectable formulations, combination therapies
- Doxycycline
- Azithromycin
- Gentamicin
- Others
- Includes experimental antibiotics under clinical trials
-

By Application

- Hospital
- Retail Pharmacy
- Public Health Clinics
- Research Institutions

Our Key Players

- Pfizer Inc. (U.S.)
- GlaxoSmithKline plc (UK)
- Merck & Co., Inc. (U.S.)
- Roche Holding AG (Switzerland)
- Astellas Pharma Inc. (Japan)
- Sanofi (France)
